

Votive Christmas Tree

1. Place pattern over desired paper
2. Cut along solid lines
3. Fold inward along all dotted lines
4. Use punches to create "ornaments" inside the fold lines of the triangle shapes.
5. Fold the triangles to create a pyramid shape, tucking and securing the flap piece inside.
6. Fold in successive bottom square folds.
7. Push a battery votive up through the slits in the squares to create a tree trunk and turn on so the light shines through the "ornament" holes.
8. Enjoy! Bonus: with the votive removed, tree folds flat for storage!

Merry Christmas
